

REMARKS

This paper is filed in response to the Office Action mailed February 4, 2005. In this Office Action, the Patent Office has withdrawn the restriction requirement. Therefore, claims 1-16 are pending.

All the drawings were objected to for being unclear. A replacement set of drawings is being submitted with this response. Accordingly, this objection to the drawings can properly be withdrawn.

Claims 1-16 stand rejected under 35 U.S.C. §102(e) as allegedly being anticipated by Park et al., U.S. Publication No. 2004/0202969 ("Park"). In response, applicants direct the Patent Office to the Korean Priority Document No. 2003-22007, with a priority date of April 8, 2003, a certified copy of which was submitted concurrently with the application, as filed, on November 26, 2003. With the submission of a verified translation of the priority document, applicants are entitled to a priority date of April 8, 2003. A verified English translation of the priority document is being submitted with this response. As the U.S. filing date for Park is November 20, 2003, it cannot be considered prior art to the current application. Therefore, this rejection can properly be withdrawn.

In view of the above remarks and the submission of replacement drawings, applicants believe the pending application is in condition for allowance and an early action so indicating is respectfully requested.

The Commissioner is authorized to charge any fee deficiency required by this paper, or credit any overpayment, to Deposit Account No. 13-2855.

Dated: May 9, 2005

Respectfully submitted,

By _____

AMENDMENTS TO THE DRAWINGS

The attached sheets of drawings are replacements for the drawings originally submitted. These drawings do not contain any changes from the original drawings, but are provided to overcome the Patent Office's objection to the blurred images of the original drawings.
